EPIC SOFTWARE GROUP INC.

www.epicsoftware.com
For over 15 years the epic software group has been producing award winning multimedia, awesome 3D animation, dynamic web sites, and incredible graphics for dozens of Fortune 500 companies. Large or small, we can help you with everything from an interactive CD-ROM catalog, to a full blown multimedia presentation. Need a storyboard, a kiosk for a trade show, or a full featured video game? How about a Flash presentation or cartoon? Our 4,000 square foot state-of-the-art production facility, located in The Woodlands, Texas has the latest equipment along with the best artists, animators, and programmers in the Southwest.

GIRLS IN GAMES, INC.

www.girlsingames.com
Girls in Games is a non-profit organization whose purpose is to encourage and support women in the gaming industry. It provides a supportive forum to exchange ideas, develop contacts, and pursue experimental projects. Our goal is to create a structure to provide ongoing mentorship and guidance to aspiring women in creating an independent game. It is a venue to gain experience in creating and producing games as well as managing development teams in a collaborative environment.

INDUSTRY PARTNERS…CONTINUED

REVELATION INTERACTIVE

www.revelation-interactive.com
Revelation Interactive LLC is a game development and entertainment software company, located in Houston, TX, comprised of dedicated designers, artist, and programmers who have the passion, talents, and skills to make a quality and profitable game. Currently, we are developing a new and exciting game that has the power to do what the American game industry has yet to do to its fullest potential: Bridge the progression of the video game and music industry seamlessly and at the same time create a mainstream franchise to continue as a profitable business. We are currently creating a demo and presentation for interested publishers in hopes of creating a whole new avenue for Entertainment Software. Because of our position and our unique angle in the industry, developing games is not the only objective we have. It's about developing grassroots, awareness, and pushing boundaries where others have neglected. We are more than just about making games, we're about creating entertainment.

SHARKBYTE SOFTWARE INC.

www.sharkbyte.com
Established in January of 1999, SharkByte Software, Inc. is a Game Development company who designs and develops massively-multiplayer online games. SharkByte is comprised of a group of highly creative, highly motivated and very talented individuals with many years of experience. The composition of this diverse group is coupled by a knowledge base of programmers, artists, and designers who thrive on excellence.

SIX FOOT STUDIOS

www.sixfootstudios.com
Six Foot was formed in response to the growing need for a full service, interactive and electronic media development company that blends the skills of a technically advanced creative firm with that of a specialty marketing and advertising agency. Six Foot has emerged as a leader in interactive and digital services; specializing in the development and execution of online brand initiatives, e-marketing programs, creative design, 2D and 3D animation, and database and back-end infrastructure development.

V3 ENTERTAINMENT

www.expedition-games.com
Expedition Games, L.P., headquartered in the beautiful and prestigious Woodlands area develops interactive entertainment software for PC/Windows personal computers. The technology of the company has recently been expanded to support PS2 and X-Box development. Recently founded, the company has focused on bringing together a core team of experienced professional artistic and engineering talents to build a top-notch game development studio with exceptional potential. The company is implementing and refining its proprietary and licensed technologies towards the goal of accelerated creation of high quality game products.
